

Maximize your green life!
maxgreenwall.com

About us

Inspired by the movement of improving quality of life all over the world, Maxgreenwall helps through increasing the amount of nature indoors.

**The eye-catching
Maxgreenwalls create a healthy,
productive and pleasant indoor
environment. With multiple
designs and options available, you
can easily bring the outdoors inside
and maximize your green life!**

The idea of Maxgreenwall emerged via collaboration of Sempergreen and Parus Europe. These movable and user-friendly indoor living walls are an addition to a wide range of sustainable, healthy and green solutions.

'Promote healthier work environments'

Indoor nature contributes to an improvement in mental- and physical health.

It boosts productivity levels in the office and significantly reduces stress levels. Plants also purify the air and enhance indoor air quality.

'Improve the acoustics'

Green walls reduce noise pollution, which is beneficial within the office and for a comfortable home environment. Moreover, a living indoor wall improves building aesthetics.

Due to its movability this green wall can easily be used as a room divider, making the Maxgreenwall stand out.

Maxgreenwall Single 360°

The Maxgreenwall Single in all its elegance. See for yourself.

System Features

Air circulation fan

The green wall contains a specialized system which circulates oxygen to effectively maintain the good condition of the greenery . The silent fan ensures the distribution of produced oxygen throughout your surroundings . By choosing for Maxgreenwall, you are choosing for an improved indoor climate!

Water reservoir

This Maxgreenwall can be installed in less than an hour and the automatic watering system only needs to be refilled every four weeks . The capillary method makes sure the plants get all the water they need .

Moveable

This free -standing and movable living room divider gives you freedom to design spaces according to your own taste . The Maxgreenwall can easily be moved to other locations because of its wheels and low weight . The possibilities for your interior are endless!

LED grow light

A specially designed grow light is included to ensure that the plants remain in a good condition . This way, Maxgreenwall can be installed everywhere in your interior , while maintaining the quality of the plants . Even in the darkest of places , this green wall will thrive !

104 plants

In total, 104 plants fit in this green wall

Wi-Fi Controller

All technical aspects , such as the watering system and light activity , are accessible online via a mobile application.

Microfilter

The microfilter ensures a clean water flow through the system

UV filter

Built-in UV filter for disinfecting the water

Maxgreenwall Single
